

# OUR SERVICES

*Book your pup with us for a fully customized training experience designed just for their unique needs and personality!*

## STAY AND TRAIN

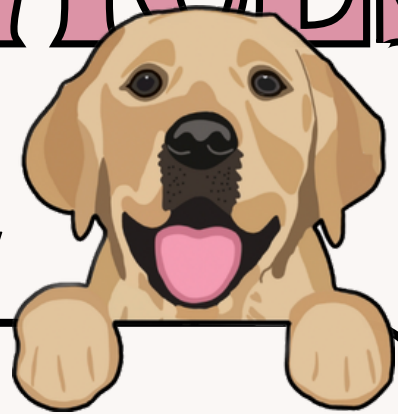

Our Stay & Train program is a **customized training experience** where your dog lives and learns with us for a set period—**either 4 or 6 weeks**. Open to all breeds, ages, and behavior levels, each program is tailored to meet your goals and your dog's individual needs. **Boarding, training, and daily care are all included in one flat weekly rate.** Up-to-date vaccines are required, and we ask that you provide your dog's food for the duration of their stay. It's not just a training program—it's a full immersion in structure, care, and progress.

## PUPPY PRESCHOOL

Puppy Preschool is our **all-inclusive Stay & Train program** created just for **puppies 4 months and younger**. At this impressionable age, your pup is soaking up the world like a sponge—every moment matters. Even before they're fully vaccinated, it's important to start safe, structured socialization and lay the groundwork for great house manners and lifelong confidence. With a strong focus on safety, our cleaning routines and scheduling are designed to protect these young learners. This exclusive program is **limited to just two puppies** at a time to ensure plenty of personalized care. **Available in 3-, 4-, or 5-week packages**, each at a flat weekly rate, everything is included to give your pup the best possible start.

## DAYCARE

Our daycare isn't just about letting dogs run wild—it's about purposeful play, engagement, and enrichment tailored to each pup. Open to all ages and breeds, we create a safe, structured environment where dogs thrive through positive interactions and meaningful activities. Every dog must complete a full-day evaluation before joining. Daycare is by reservation and approval only. For our training graduates, optional field trips and training add-ons are available to keep the fun and learning going.

## OVERNIGHTS

Our boarding is intentionally limited to provide a calm, private, and home-like environment where your dog gets the attention they deserve. We focus on quality over quantity—every guest is part of our pack. A full-day evaluation is required for approval, and dogs must be crate trained (a fee applies if not). Daycare is included, and for our training graduates, field trips and Finishing School add-ons are available. It's more than a place to stay—it's a place to feel at home.

## PRIVATE SESSIONS

Private sessions happen in your home with your dog present and can include the whole family or just one caregiver. Sessions last 60–90 minutes, typically once a week, and are available 7 days a week (times vary). We demonstrate training first, then guide you as you practice. Questions are always welcome, and we offer text support between sessions. Pricing is based on your dog's age and behavior. We're here to support you every step of the way—your dog's success is our shared goal.
